

## Houseplants for Low Light

Low light rooms typically have a north facing, or shaded window. If you have trouble reading in the room without turning on a lamp, then it's probably low light.

### The Plants

- |   |   |
|---|---|
| <ul style="list-style-type: none"><li>• <b>Ferns</b>- such as maidenhair, rabbit's foot, bird's nest, Boston, tree, staghorn, and mother</li><li>• <b>Cast iron plant</b>- an underrated and hardy houseplant!</li><li>• <b>Sansevieria</b>- low water needs</li><li>• <b>ZZ Plant</b>- low water needs</li><li>• <b>Pothos</b>- many wonderful varieties of this vining plant</li><li>• <b>Spider plant</b>-they make babies so you can share with friends</li></ul> | <ul style="list-style-type: none"><li>• <b>Ficus</b>- all varieties are tolerant of low light</li><li>• <b>Tradescantia</b>- who can resist those iridescent leaves?</li><li>• <b>English ivy</b>- a wonderful vining and versatile plant</li><li>• <b>Peace lily</b>- a top air purifier that requires regular watering</li><li>• <b>Dracaena</b>- tolerant of many different light conditions</li></ul> |
|---|---|

❖ Remember, low light does not mean no light. A bathroom with no windows or a fully shaded window is too dark.
